Preliminary Amendment Acknowledgement

Receipt is acknowledged of First Preliminary Amendment filed on 2-28-2002 and Second Preliminary Amendment filed on 5-10-2005.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-39 and 45-48, drawn to an apparatus for recording data comprising an optical source and a structure having a transmission resonance corresponding to a waveguide mode, classified in class 369, subclass 112.27.
- II. Claims 40-44, drawn to an apparatus which consists of a metallic structure having an array of features that couple the radiation to at a least one surface plasmon mode of the structure, classified in class 369, subclass 121 or class 385 sub 33.

During a telephone conversation with Daniel Johnson on 5-10-2005, a provisional election was made without traverse to prosecute the invention of Group I, claims 1-39 and 45-48.

Claims 40-44 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Daniel Johnson on 5-10-2005.

The application has been amended as follows:

Non-elected claims 40-44 have been cancelled.

Allowable Subject Matter

Claims 1-39, 45-48 are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claims 1, 27, 36, 37, 45, more particularly define the structure and method of directing optical radiation onto a data recording medium which consists of a metallic structure with optical aperture with specific dimension to support optical radiation propagating in a waveguide mode of the aperture and resonantly coupling

optical radiation into the metallic structure. The optical radiation includes a frequency that matches a transmission resonance of the waveguide mode.

These particulars, combined with remaining claim elements are not suggested in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
